WHITE PAPER

VERSION 1.0 , JUNIO 2021

Monkey Development

Legal Disclaimer

IMPORTANT NOTICE

PLEASE READ THIS ENTIRE SECTION AND DO NOT TAKE ANY ACTIONS UNTIL YOU FINISH IT. THIS WHITE PAPER IS A SUMMARY OF MONKEY TOKEN BUSINESS MODEL, TECHNOLOGY, AND BRIEF INTRODUCTION TO MONKEY TOKEN PRINCIPLES. PLEASE CONSULT YOUR LEGAL, FINANCIAL, TAX AND OTHER PROFESSIONAL ADVISOR(S) BEFORE ACQUIRING MONKEY TOKENS.

Purpose

The purpose of this whitepaper is to introduce the monkey project in relation to the Token Monkey (MONKEY). The project as described in this technical document is under development and is constantly updated, including, among others, the technical characteristics, the behavior model of the token, technology, unique characteristics, operation, etc. The Monkey team reserves all rights to add, delete or modify any information in this document.

Monkey Token only exist purely on Binance Smart Chain and in the crypto space, the information provided will in no way constitute a recommendation as to whether you should invest in the token or not. Monkey Token does not accept any responsibility for any loss that occurs to any person acting or refraining from acting as a result of any material provided or posted. Monkey was built by the community as an experiment in decentralization.

No sale of security

This whitepaper does not constitute a prospectus or financial services offer document and is not an offer to sell or solicitation of an offer to purchase Token Monkey.

Features & Focus

Monkey Ecosystem.

The Monkey Protocol is a deflationary decentralized Meme Tokens created to safeguard primate life in the world and turned into a huge ecosystem.

Monkey is a most revolutionary decentralized token of the BSC ecosystem with unique features that rewards holders for only having the token supported. The project is fully supported and community-based. Are you willing to win a x100000 and receive passive profits?

MONKEY is a decentralized spontaneous community building experiment. The MONKEY token is our first token and allows users to have billions or even trillions of monkeys. Nicknamed the MONKEY, this BEP-20 token can ONLY stay below a penny and still climb very high. Popular with its community, it is only a few days old, estimating that it will reach very high in its market capitalization, the MONKEY TOKEN (\$ MONKEY) token will have an initiative that includes MonkeySwap, our decentralized exchange for the entire community.

We blocked 60% of the total supply on PancakeSwap! The remaining 20% was burned to darkness (lost) and the other 20% will go to project development and continuous ecosystem improvements. Monkey token ensures a fair and complete distribution where the community has full control of supply and demand.

For each transaction: 10% transaction tax is charged, 6% goes to holders, 4% is automatically applied to the group's liquidity pool locked.

Deflation: As the recording address participates as the incumbent, the offer decreases forever.

Anti-Whales: Buying and selling limitations were placed to prevent the price from dropping too low for whales.

Limitation for trade (BUY)
3,000,000,000,000 Tokens

Limitation for trade (SELL)
100,000,000,000 Tokens

20% Supply is burned at start to a black hole address, this address also participates in the protocol, it accumulates more tokens, thereby effectively removing them from circulation

For holders: The MONKEY bonus feature was implemented by simply keeping the token in their wallets, you will see how your balance grows over time generating passive income.

The focus on supporting primate shelters around the world is one of the cornerstones of this project. We are very active in our community and we strive to build trust by being transparent in our mission and objectives, we are focused on making continually successful efforts to safeguard the lives of primates around the world, giving back by contributing through the MONKEY TOKEN project with the In order to provide them with a stimulating three-dimensional environment with natural vegetation, branches, rope platforms and hiding places that allow them to express natural behaviors and days of socialization with their own species.

This act of love allows any member within or outside of the Monkey Token community to help rescue monkeys that are at risk of illegal trafficking and that can be rehabilitated and incorporated into safe environments through sanctuaries located around the world.

Features & Focus

Monkeys Rescue With sanctuaries in the world.

The monkeys are amazing.

Primates are under constant threat. In some places they hunt them to eat them, to smuggle certain parts of their bodies, or they capture them to sell them as pets, and export them illegally to every corner of the planet. Many of the monkeys that have been treated like domestic animals are later rejected by their families when they grow up. These monkeys are transferred to the monkey sanctuary to be released into a wild forest with waterfalls and mountains with springs, so that there is a safe environment where the monkeys can be rehabilitated, with professionals and volunteers who can take care of them. In this environment you can walk and wander along wooden suspension bridges, through indigenous forests and find a great variety of exotic monkeys in a natural environment. These conservation projects take place in different animal sanctuaries, to help monkeys, elephants, wild dogs, vultures and eagles, among others.

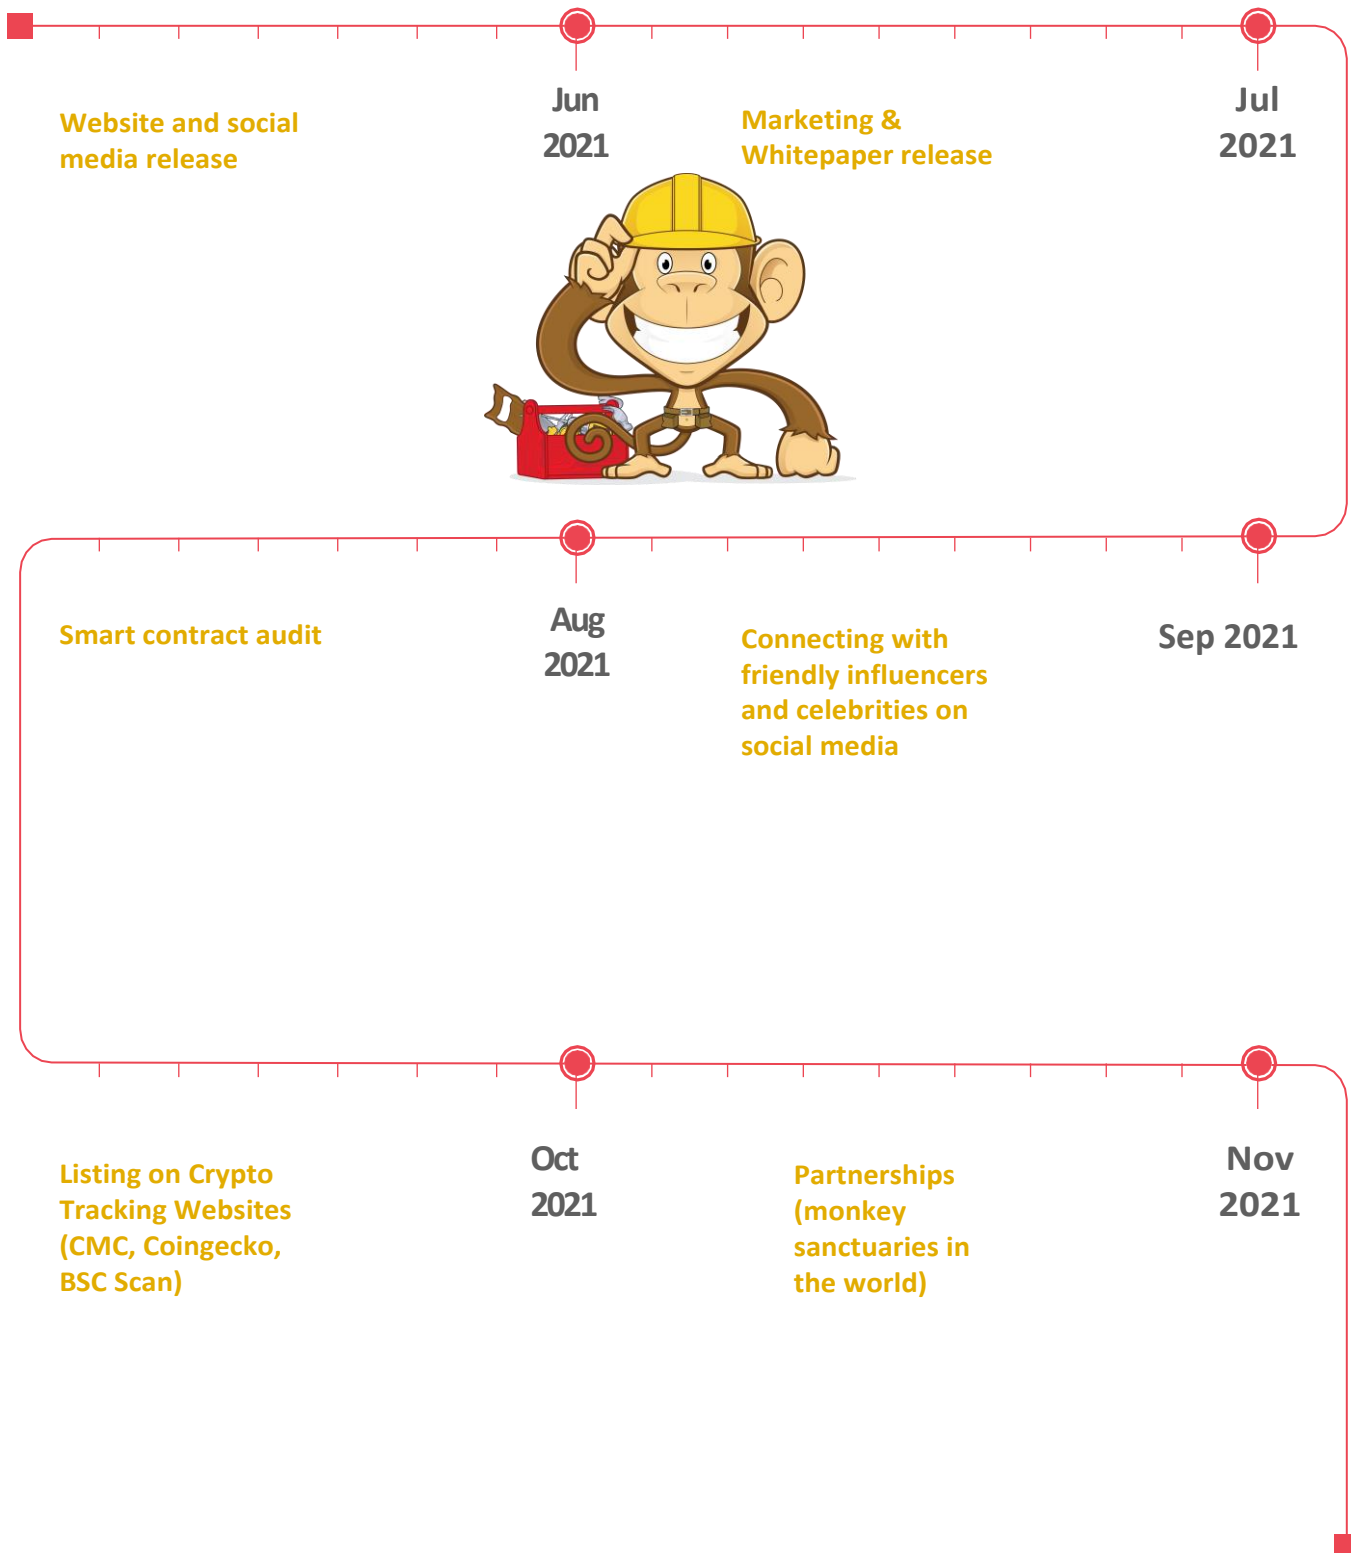

With the MONKEY TOKEN project it is intended to decentralize donations and / or payments to the different sanctuaries located around the world by implementing Blockchain technology as a means of payments, thus avoiding the high commissions and cumbersome procedures imparted by banks when making international transfers, use credit cards, sending money through virtual wallets, using platforms for sending and receiving money, etc.

With this project, anyone inside or outside the MONKEY TOKEN community will be able to send their donations, volunteer payments, flight reservations, accommodations or any other payment that resides in the sanctuary, these payments will be received directly by the monkey sanctuaries located in the world and that they are using our MONKEY TOKEN de-centralized exchange platform in order to improve the quality of life of the animals that reside there and the environmental conditions of the different centers, since the creation and maintenance of these sanctuaries is very important . This ensures a safe and educational environment, where visitors can experience, learn and be aware of the present situation of primates in Africa or anywhere in the world.

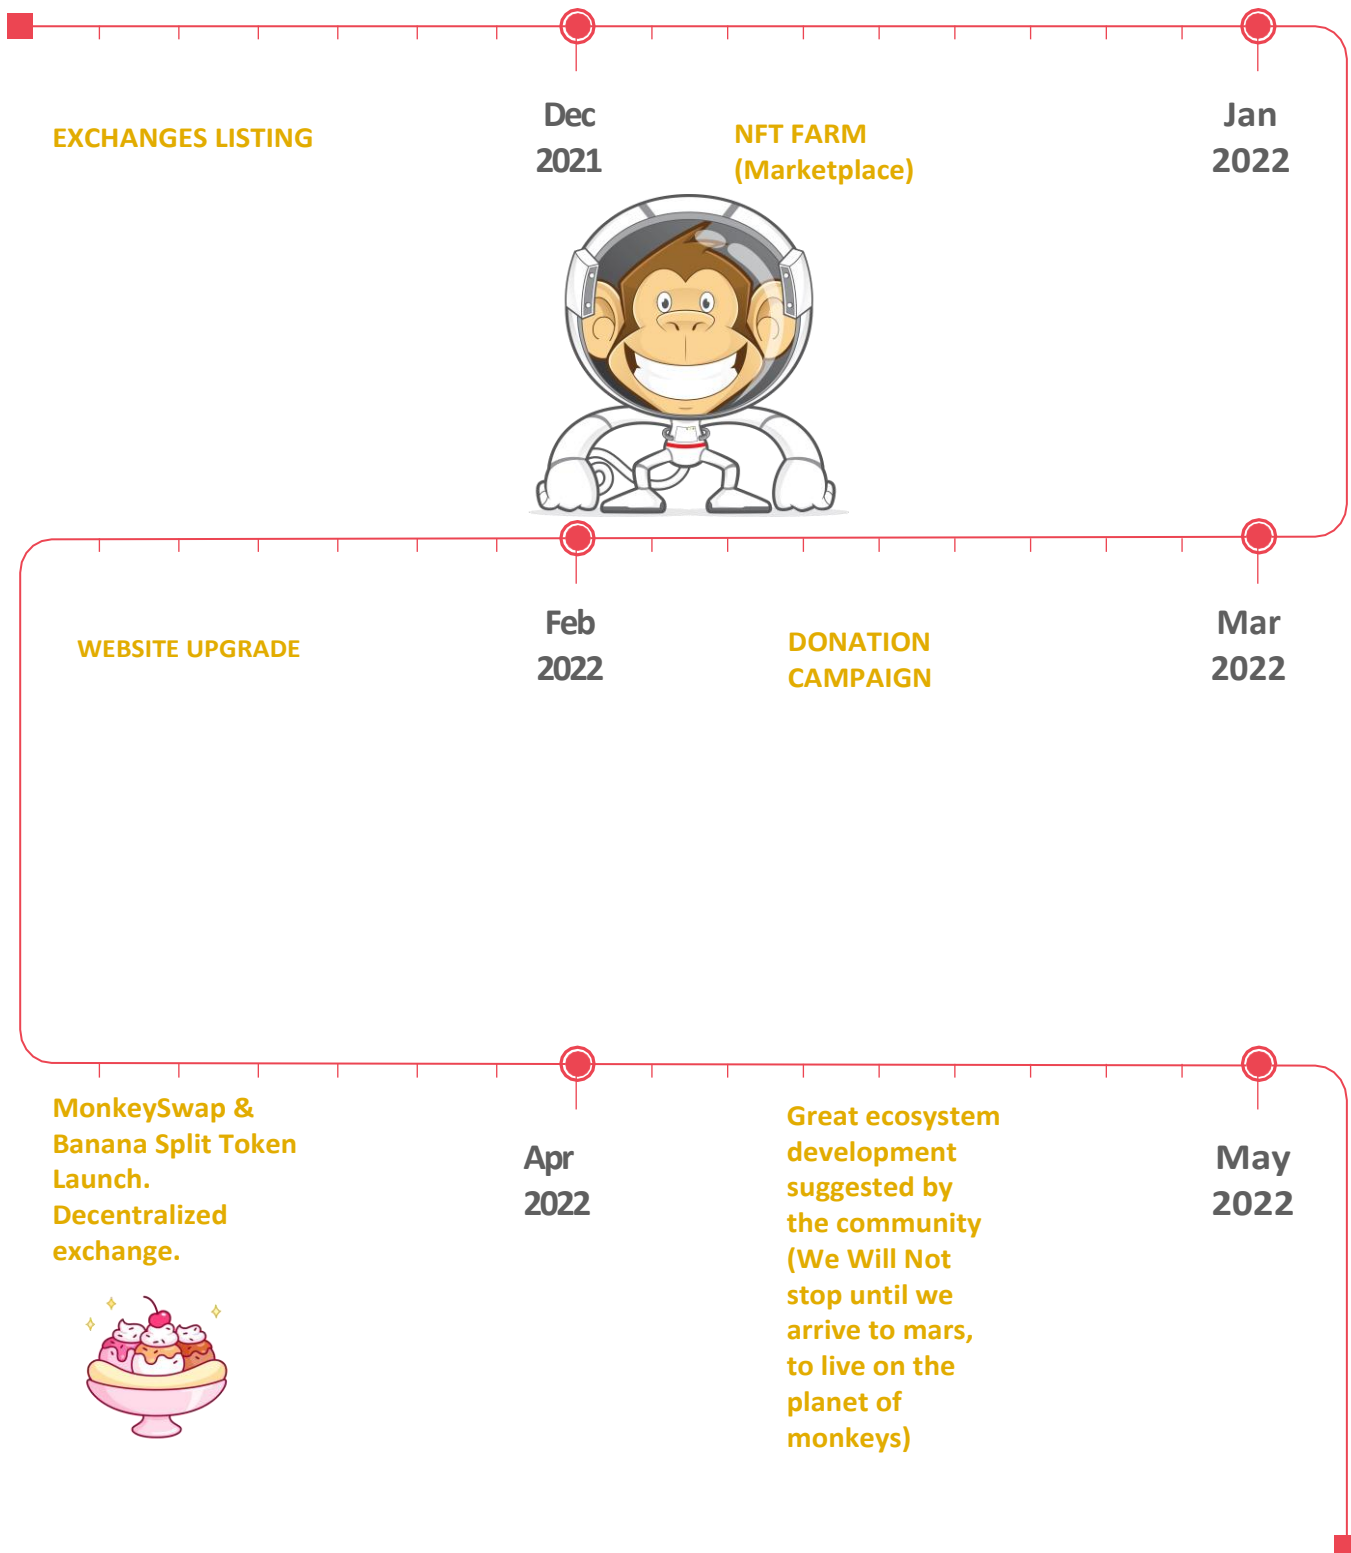

RoadMap

Monkey roads phase I.

RoadMap

Monkey roads phase II.

Tokenomics

Monkey token was listed on the de-centralized exchange PancakeSwap and locked on Jun-09-2021 02:16:50 AM + UTC.
